EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gregory T. Lowen on 11/10/2003.

The application has been amended as follows:

The claims:

Claim 1: line 4, delete "0.05" and insert --0.01--.

Claim 4: line 2, delete "150" and insert --100--.

Claim 5: delete "previously".

Claims 8-9: delete "previously".

Claim 10: line 4, delete "0.05" and insert --0.01--.

Claim 11: delete "previously".

Claim 15: delete "added" and insert --presented--.

Claim 16: delete "added" and insert --presented--.

Claim 17: delete "added" and insert --presented--.

Claim 18: delete "added" and insert --presented--.

Claim 19: delete "added" and insert --presented--.

Claim 20: delete "added" and insert --presented--.

REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance: Note that the present amendment, applicants' arguments and declaration filed on 09/30/2003 together are sufficient to overcome the art rejections in the Office Action mailed on 05/30/2003 and sufficient to place the instant claims in condition for allowance. The inclusion of the fine continuous channels extending from one surface to another surface of the film in a non-linear fashion and a resistance to passage of air from 30 sec/100 cc to 2000 sec/ 100cc renders the claims patentable over the prior art. The declaration provides the sectional SEM images to demonstrate that the elliptic pores in Tomioka film were found to exist independently one by one (figures 1 and 2). Further, there are no open pores on the surface of the film (figures 3 and 4). In addition, Mr. Yoshihiro Kusuki prepared the film in accordance with the procedure disclosed in Tomika and he found that the porous film is unable to attain the resistance to passage of air within the claimed range. Accordingly, since the prior art fails to teach or suggest a porous film having structures described, the instant claims are deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
